

LANDSCAPE MASTERY ARCHITECTURAL MASTERCLASS

Comprehensive Field Execution Syllabus & CAD Blueprint Guide (2026)

Course Overview & Field Blueprint Curriculum

This comprehensive masterclass provides rigorous, professional-grade landscape architecture frameworks, topography cut/fill analysis, grading calculation toolkits, stonework masonry specifications, biophilic plant palettes, and nocturnal lighting engineering.

Module #	Module Topic & Field Competency	Lessons	Duration
Module 01	Spatial Planning, Topography & Soil Mechanics • Site analysis, geological contour mapping, cut/fill calculation	4 Lessons	3h 15m
Module 02	Hardscape Geometries, Masonry & Structural Retaining • Stone selection, cantilevered terraces, spec sheets & CAD prints	3 Lessons	2h 50m
Module 03	Planting Ecology, Canopy Stratification & Microclimates • Native flora, drought tolerance, root depth dynamics	4 Lessons	3h 30m
Module 04	Nocturnal Lighting Scenography & Water Engineering • Low-voltage illumination, reflection pools, hydraulic calculations	3 Lessons	2h 40m

Technical Blueprints & Practical Toolkits Included

• Full Vector CAD Blueprint Package (.DWG, .DXF, .PDF Vector Specifications) • Topographical Slope Grading Spreadsheet & Earthwork Volumetric Calculator • 150+ Mediterranean & Drought-Tolerant Botanical Planting Matrix • Low-Voltage Luminaire Photometric Layout Guidelines • Construction Execution Checklists and Contractor Sign-Off Templates
